

Bitcoin Education Institute

BRAND GUIDELINES

Version 1.0

BRAND OVERVIEW

An Institution for Bitcoin Scholarship

The Bitcoin Education Institute advances sound knowledge, independent research, and critical thinking about Bitcoin within higher education.

Bitcoin Education Institute (BEI) is an educational and institutional brand built on credibility, trust, and intellectual seriousness. Its purpose is to give Bitcoin a place on the podium of human knowledge, alongside the core academic and scientific disciplines. The identity is academic and premium, yet accessible and modern. It avoids hype, gimmicks, and generic crypto language in favor of a measured, scholarly voice.

Brand Personality

Scholarly. Credible. Timeless. Principled. Bitcoin-native.

Desired Impression

Quality	What It Means
Credible	Trusted as a serious, independent source of Bitcoin knowledge.
Educational	Built to teach, clarify, and deepen understanding.
Institutional	Carries the weight and permanence of an academic body.
Timeless	Designed to endure, not to follow trends.
Bitcoin-native	Fluent in Bitcoin's technical and philosophical foundations.

LOGO SYSTEM

The Approved Assets

The BEI identity is a system of four approved assets. Each has a defined role. Use the right asset for the right context, and do not substitute one for another.

Primary Horizontal Logo

Asset	Description	Primary Use
Primary Horizontal Logo	Column icon, vertical divider, and the full wordmark.	Formal and client-facing applications.
Wordmark	The Bitcoin Education Institute text, set on its own.	Simpler institutional text treatments.
Icon	The standalone column symbol.	Favicons, compact and decorative moments.
Monogram / Secondary Mark	The BEI lettering with the open-book graphic.	Avatars, watermarks, stamps, community use.

Designer note: show all four assets on a clean grid, each on white with generous clear space.

PRIMARY LOGO USAGE

Leading With the Primary Logo

The Primary Horizontal Logo is the default identity for BEI. Use it wherever the brand is presented formally or to an external audience. It should be the first and most frequent expression of the brand.

Where to Use It

- Website header and primary navigation
- Formal documents and reports
- Proposals and grant materials
- Presentation decks and title slides
- Letterhead and official correspondence
- Partner, sponsor, and institutional materials
- Event signage, programs, and collateral

Spacing and Legibility

Give the logo room to breathe. Keep clear space on all sides and never crowd it with text, images, or graphics. Reproduce it from the approved files only, and never rebuild or rearrange its parts. Place it on backgrounds with strong contrast so the wordmark stays sharp and readable at every size.

SECONDARY MARKS

Wordmark, Icon, and Monogram

Three supporting assets extend the brand into spaces where the full primary logo does not fit. They support the primary logo. They do not replace it in formal use.

Wordmark

Use the wordmark when a clean, text-only institutional treatment is needed, or when the column icon would feel redundant alongside nearby brand cues.

Bitcoin Education Institute

Icon

The standalone column is for favicons, app tiles, small brand moments, and decorative or compact applications where the full name is not required.

Monogram / Secondary Mark

The BEI and open-book mark is the monogram. Use it for avatars, watermarks, stamps, social profiles, community materials, and slide footers.

When Not to Use the Monogram

- Do not use the monogram as the primary brand identity.
- Do not use it in place of the primary logo in formal or client-facing applications.
- Reserve it for compact, social, and community contexts.

COLOR SYSTEM

A Restrained, Institutional Palette

The palette is deliberately narrow. Deep navy and black carry authority, gold provides a single warm accent, and cream and white give the brand air and calm. Use color sparingly and let the gold do quiet, deliberate work.

Swatch	Name	HEX	RGB	CMYK
	Primary Navy	#01091C	1 / 9 / 28	92/82/55/77
	Primary Black	#111111	17 / 17 / 17	73/67/65/79
	Institutional Gold	#B38A49	179 / 138 / 73	26/41/79/8
	Light Gold	#D8B080	216 / 176 / 128	15/30/52/2
	Cream / Ivory	#EEEEBE5	238 / 235 / 229	6/6/9/0
	White / Reverse	#FFFFFF	255 / 255 / 255	0/0/0/0

CMYK values are starting references for print. Confirm against a proof before any production run.

When to Use Each Version

- **Full color:** the default. Black or navy wordmark with the gold icon and accents.
- **Black:** single-color use on light or cream backgrounds where color is not available.
- **White / reverse:** on navy, black, or dark photographic backgrounds.
- **Single color:** for stamps, engraving, embossing, and one-color print where tints are not possible.

CLEAR SPACE AND MINIMUM SIZE

Protecting the Logo

Clear space keeps the logo legible and uncrowded. Define one spacing unit and apply it on every side.

The Spacing Unit

Use the width of the column icon as the spacing unit, marked X below. Keep at least one X of empty space between the logo and any text, image, edge, or fold. When in doubt, add more.

Minimum clear space equals one icon width (X) on all sides.

Minimum Size

Context	Primary Logo	Icon / Monogram
Digital	160 px wide	32 px wide
Print	1.25 in wide	0.35 in wide

Below these sizes, the wordmark loses legibility. Use the icon or monogram instead of shrinking the primary logo.

INCORRECT USAGE

What Not to Do

Consistency protects the brand. Reproduce the logo only from approved files, and never alter it.

A few of the most common misuses. Avoid all of them.

- Do not stretch or distort the logo.
- Do not recolor outside the approved palette.
- Do not add shadows, outlines, gradients, or effects.
- Do not rotate the logo.
- Do not change the spacing between elements.
- Do not place it on low-contrast or busy backgrounds.
- Do not recreate the wordmark in a different font.
- Do not use the monogram in place of the primary logo in formal applications.
- Do not separate the primary logo elements, except when using the approved standalone assets.

TYPOGRAPHY

A Scholarly Type Voice

Typography should feel academic, formal, and premium while staying highly readable. Pair a refined serif for headlines with a clean, neutral sans for body and interface text.

Role	Typeface	Direction
Primary / Headlines	Tiempos	High-contrast serif. Authoritative and editorial.
Secondary / Body	Inter	Neutral humanist sans. Calm and legible.

Usage Guidance

- **Headings:** primary serif, generous size, tight and confident spacing.
- **Body copy:** secondary sans, comfortable line height, left aligned.
- **Captions and labels:** secondary sans, smaller, in grey for quiet hierarchy.
- **Formal documents:** serif for titles and section heads, sans for running text.

FILE USAGE GUIDE

Choosing the Right File

Each format has a purpose. Use the right file for the medium to keep the logo crisp and consistent.

Format	Best Use	Notes
SVG	Websites and scalable digital use.	Vector. Stays sharp at any size.
PNG	Presentations, social graphics, transparent backgrounds.	Raster. Use the largest size available.
PDF	Print, vendor handoffs, formal documents.	Vector. Preferred for professional printing.
EPS	Professional print and design software.	If included. For production and signage vendors.

File Naming

Files follow a clear, predictable pattern so the right asset is easy to find:

BEI_[Asset]_[Color].[Format]

- **Asset:** Wordmark for the primary logo and wordmark, Logo for the monogram mark.
- **Color:** Black for light backgrounds, White for dark backgrounds.

Example: BEI_Wordmark_Black.svg is the black primary logo for web. BEI_Logo_White.png is the white monogram for dark backgrounds.

CLOSING

One Voice, Carefully Kept

Consistency is credibility. Used with care, the BEI identity earns trust over time.

These guidelines exist to protect the clarity and integrity of the Bitcoin Education Institute brand. Apply the assets, colors, and type as defined here, reproduce them only from approved files, and the brand will hold its authority across every audience and medium.
